# Band

Design Petra Lassenius

Band is a versatile sectional sofa model. From its wide selection of modules it is easy to build just the right combination for your needs.

The hearty cushions are filled with a combination of feathers and polyester fiber to create a comfortable and relaxed nest for your home. Choose between two types of armrests, the classic wide design which also acts as a back rest in corner sofas or the lighter narrow armrest.

Band has a removable fabric upholstery. Removability makes the cover easier to clean and lets you fit your sofa with a new cover when your home décor or life situation changes. Ordering a new cover for the sofa can prolong the lifetime of the product.
